

## The Alexanders Pro Paint Finish™

### What?

is the Alexanders  
Pro Paint Finish

The Alexanders Pro Paint Finish ensures that your Alexanders Horsebox receives treatment of an automotive standard before being handed over to you. Whether in simple colours or one of our custom triple metallic stylings all vehicles are completely stripped down and painted with high volume, low pressure spray guns before being baked in our dedicated paintshop oven at temperatures up to 70 degrees centigrade.

### Why?

is it so important to  
your vehicle

We want your Alexanders horsebox to look its very best of course, but giving you a professional paint finish is also about protecting your vehicle and maintaining its value for future sale. This is why we even pay attention the parts you don't always see, such as painting door linings and the underside of the bonnet.

### Where?

is the Pro Paint  
Finish applied

All Alexanders Horseboxes are painted in our own dedicated bodywork paintshop using water based paints and an eco friendly commercial paint booth. Our paint team hold 125 years of experience between them and use our in house mixing scheme to offer you any colour of your choice. Our insurance approved bodyshop is also used to paint luxury and sports cars from our sister business Alexanders Prestige, such as Bentleys and Ferraris, thus setting the standard we expect to work to on your Alexanders Horsebox.

Alexanders is a registered trademark of Alexanders Prestige Limited. Alexanders Prestige Limited also has numerous unregistered rights in the designs of its products, together with copyrights in its promotional material. When applicable Alexanders Prestige Limited will take all necessary action to defend these rights.
