

## Alexanders - Renault Approved™

### What?

#### is a Renault Approved Conversion

As one of the Worlds leading suppliers of Chassis and Platform Cabs for conversion to a wide variety of specialist use vehicles Renault understandably have a keen interest in working alongside the body builders that best demonstrate the quality and versatility of the Renault product. As such they have developed a very limited list of 'Renault Approved Converters' to whom they are happy to refer customers for specialist products such as our horseboxes. Alexanders are the only Horsebox Manufacturer on that list.

### Why?

#### is it important to your Horsebox

Renault Approved Converter status gives you the assurance, rather like our EC Whole Vehicle Type Approval, that we are working to a global chassis manufacturers standards, a standard that they themselves are prepared to recommend. It also gives you extra peace of mind that Renault themselves are familiar with Alexanders' work and through their Pro+ network give you greater access to our products as well as to their excellent aftercare.

### How?

#### is Renault Approved Status granted

Renault only grant Approved Converter status to a limited number of companies that specialise in their fields. A team of inspectors from the French parent company and managers from the UK visit the facilities for a full assessment of designs, working practice and finished products to ensure that they are satisfied and confident enough to put their name behind ours. Alexanders Horseboxes are now the only Renault Approved UK Horsebox manufacturer.
